Power Your Surgery

*From a Spark of Insight to
Innovation with Global Reach*

Who We Are

At the heart of IntoCare is a clear purpose: **Transforming Patient Care Through Insight and Innovation.**

Founded in 2015, we develop and manufacture proprietary surgical technologies shaped by real clinical needs. By integrating clinical insight, engineering expertise and intelligent technology, we translate complex surgical challenges into intuitive, reliable solutions designed to support greater precision, consistency and efficiency in the operating room.

From pioneering the world's first intelligent powered stapling platform to building a broader portfolio of smart surgical solutions, IntoCare continues to expand the possibilities of surgical technology—bringing meaningful innovation to healthcare professionals and patients worldwide.

What Makes Us Different

Focused Expertise

We stay deeply focused on surgery, building long-term clinical understanding and translating it into technologies that address meaningful needs in the operating room.

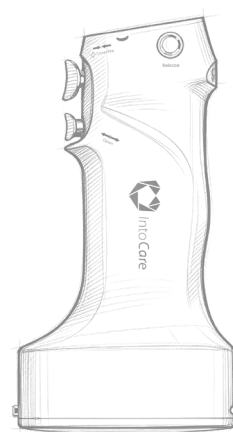

Original Innovation

We bring clinical insight, multidisciplinary engineering and proprietary technology together to create differentiated solutions that advance the possibilities of surgery.

Built to Global Standards

From research and development to manufacturing, quality and regulatory compliance, we build our technologies to meet the expectations of leading healthcare markets worldwide.

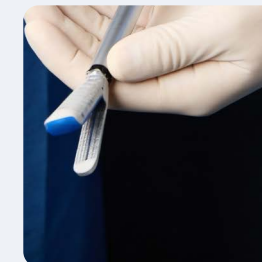

BUILT ON INNOVATION PROVEN GLOBALLY

As IntoCare continues to grow across markets and partnerships, the principles that guide us remain constant. Excellence, Respect, Integrity and Cooperation shape how we make decisions, build trust and deliver on our commitments—providing a consistent foundation for sustainable, long-term growth.

EXCELLENCE · RESPECT · INTEGRITY · COOPERATION

Innovation with Global Reach:

Innovation Leadership

550+ patents filed globally, with over **60%** being invention patents.

Global Market Access

Approved across **50+** countries and regions worldwide.

Clinical Adoption

Used in **800+** hospitals across global markets.

Sustainable by Design

Through reusable architecture and thoughtful product design, we seek to reduce resource consumption and medical waste while supporting more sustainable healthcare delivery.

**Data as of August 2026*

| Driven by Innovation

| Designed for Sustainability

THE WORLD'S **FIRST** PLATFORM-BASED STAPLING SYSTEM

Setting a New Benchmark in Medical Device Design

Powered by an intelligent “Sense–Think–Act” program control system and built upon a universal powered handle platform, our Powered Stapling Systems transform complex surgical technology into an intuitive, adaptive and sustainable experience.

IntoCare™ Powered Stapling Series

Phoenix™ Central Powered Stapling Series

INTUITIVE

Make advanced technology feel simple

ADAPTABLE

Adapt to diverse needs from all healthcare stakeholders

SUSTAINABLE

Drive Go-Green Initiatives to create a better world

IPC™ (Intelligent Program Control) System

guarantees safer surgery and consistent performance

Optimized Ergonomic Design

contributes to greater workflow with minimal effort

Unified Platform

offers compatibility to provide an intuitive and sustainable solution

UNIFIED INNOVATION SUSTAINABLE CARE

The concepts of IntoCare™ Powered Stapler and Phoenix™ Central Powered Stapler are rooted in a profound commitment to both surgeons and patients. By delivering intuitive operation, we enable surgeons to focus on what matters most—achieving consistent patient outcomes.

Our highly compatible, platformized approach redefines surgical versatility, streamlining workflows to reduce time, cost, and learning curves. Furthermore, our commitment to sustainable product design actively advances global green initiatives, reducing medical wastes to protect our shared environment while advancing global healthcare.

Solutions that share our brand philosophy across generations

IntoCare™ Powered Stapling Series

One Platform
Multiple Stapling Needs

As the first generation of the IntoCare powered stapling platform, the IntoCare™ Powered Stapling Series introduced the **X-in-One architecture** — enabling multiple stapling instruments to share one powered handle, with a consistent workflow and intuitive operating logic across procedures.

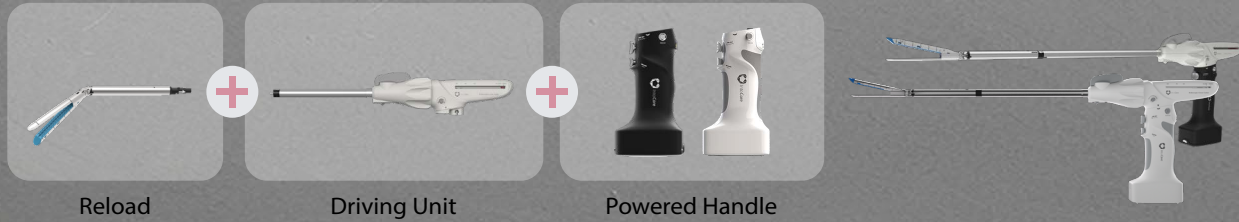

Its versatility is particularly valuable in surgeries such as **colorectal procedures**, where both linear and circular stapling are routinely required. A reusable powered handle, designed for up to **100 procedures**, further helps balance clinical performance with procedural efficiency, cost management and reduced device waste.

- **X-in-One versatility** — one powered handle across multiple stapling applications
- **Consistent workflow** — familiar operation across linear and circular stapling
- **Designed for procedural efficiency** — especially suited to procedures requiring both circular and linear stapling
- **Reusable by design** — supporting up to 100 procedures with one powered handle

IntoCare™ Powered Circular Stapler

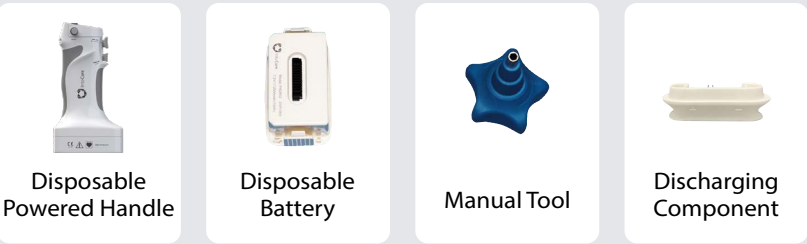

IntoCare™ Powered Endoscopic Linear Cutting Stapler

IntoCare™ Disposable Powered Handle, Universal

- Provided:** Sterile
Shelf-life: Five Years
Accessories: Disposable Battery, Manual Tool, Discharging Component
Packaging Format: 1Pc/Box, 5Boxes/Ctn

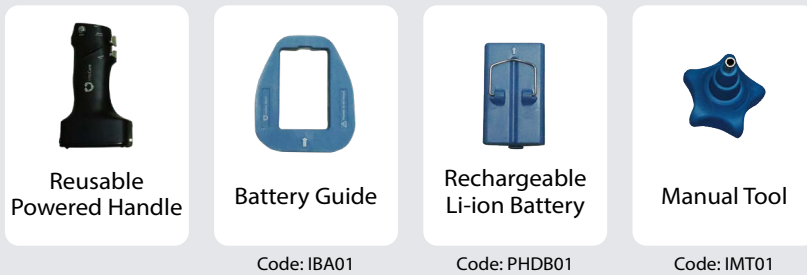

PHDS01A Disposable

IntoCare™ Reusable Powered Handle, Universal

- Provided:** Non-sterile
Service life: Three years
Sterilization Limit: 100 Times Steam Sterilization
Accessories: Battery Guide, Rechargeable Li-ion Battery, Manual Tool
Packaging Format: 1Pc/Box, 2Boxes/Ctn

PHD01A Reusable

IntoCare™ Instrument Case (Optional) PHDA01

- **Provided:** Non-sterile
- **Application:** Protect IntoCare™ Reusable Powered Handle during sterilization
- **Packaging Format:** 1Pc/Box

IntoCare™ Battery Charger PHDC02

- **Provided:** Non-sterile
- **Application:** Charge IntoCare™ Rechargeable Li-ion Battery
- **Packaging Format:** 1Pc/Box

IntoCare™ Powered Circular Stapler

PhoenixTM

Central Powered Stapling Series

Intelligence at the Core Efficiency at Scale

Building on the proven foundation of the first-generation platform, **PhoenixTM represents the next evolution of IntoCare powered stapling** — bringing greater efficiency, accessibility and sustainability into one unified platform.

At the heart of PhoenixTM is the reusable **CoreUnitTM** — the central intelligence behind the system. Designed to power and control multiple Phoenix instruments, the non-sterile CoreUnitTM supports up to **350 procedures and 4,200 firings, with up to 12 hours of battery duration**, helping simplify device management and support demanding surgical workflows.

With a reusable architecture designed for greater operational efficiency, PhoenixTM is particularly suited **to high-volume surgical centers** and specialties with intensive stapling needs.

- **Centralized intelligence** — one CoreUnitTM powers and controls multiple instruments (including PhoenixTM series Linear and Circular staplers)
- **No sterilization required for CoreUnitTM** — simplifying turnover and device management
- **Designed for greater accessibility** — bringing powered stapling to more procedures and care settings
- **A more sustainable architecture** — extending the reusable core while reducing reliance on fully disposable systems

The CoreUnitTM — The Brain Behind Every Staple

Provided:	Non-Sterile
Service-life:	5 years service life. 350 surgeries or 4200 firings limits.
Packaging Format:	1Pc/Box, 4Boxes/Ctn

CPU01P
Reusable

Charging Cord: Complimentary with each CoreUnit order (configuration varies by country/region)

Charging Dock: Available separately (CoreUnits shown for illustration only; not included.)

IntoCare Reload Family

EXPANDING SURGICAL POSSIBILITIES

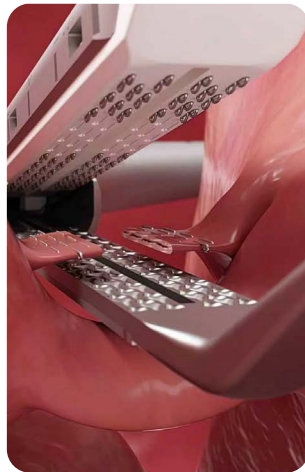

Engineered to deliver consistent performance and reliable outcomes, the IntoCare Reload Family empowers surgeons with greater control, flexibility, and confidence—supporting diverse procedures and advancing patient care worldwide.

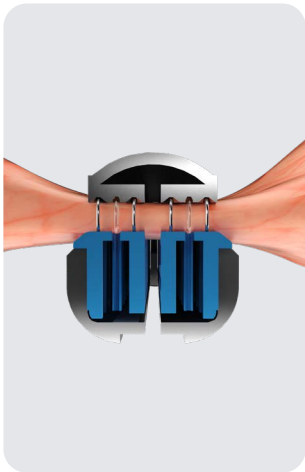

Large Angulation

60° articulation angle with short articulating tip enables precise access in challenging anatomies.

SRT™ Technology

Retains loose staples to enhance safety, boost efficiency and reduce complication risks.

Optimized Structure

Strong cartridge housing and anvil with optimized compression mechanism allows for consistent staple formation and tissue protection.

IPC™ Technology

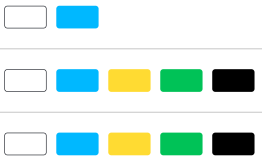

Intelligent program control for safe compression and firing, delivering consistent clinical performance.

IntoCare Reload Family

I-load Series

Integrated cartridge is provided for each reload, designed to ensure seamless operation.

	I-load Standard Reliable & versatile choice	30mm 45mm 60mm	
	I-load Curved Tip Slim curve, better access	30mm 45mm 60mm	
	I-load Stepped Enhanced adaptability & perfusion	45mm 60mm	

M-load Series

Multiple interchangeable cartridge design, matching different procedure needs.

	M-load Standard Including Loading Unit & Interchangeable Cartridge	45mm 60mm	
	M-load Curved Tip Including Loading Unit & Interchangeable Cartridge	45mm 60mm	

**All reloads within the IntoCare Reload Family are compatible with IntoCare™ Powered Endoscopic Linear Stapler and Phoenix™ Central Powered Endoscopic Linear Stapler.*
